UNSTOPPABLE

New Traxxas Summit™ with T-Lock™ Remote Locking Differentials

Monster truck innovation reaches a new high as Traxxas offers the first-ever remote locking differential system (patent pending) that allows you to lock and unlock the front and rear differentials right from your transmitter. Summit delivers all the fun of blazing down the track or trail and attacking jumps at speed with the sure-footed feel you expect from its E-Revo DNA. When the trail ends in an impossible climb, there's no need to turn around; just drop the transmission into first gear for a super-low 70:1 gear ratio and lock the front and rear T-Lock differentials for maximum traction—right from transmitter. Summit's ultra-long-travel suspension tracks over rocks like no solid axle truck can as the T-Lock differentials keep all four wheels powered no matter which tire is gripping or slipping. When you've cleaned the climb and it's time to get back up to speed, flip the switch to unlock the diffs, grab second gear, and hit the trail. Summit gives you complete control.

- T-Lock remote locking differentials lock and unlock on demand from your transmitter.
- Electronic diff locking controller allows you to choose between front-locked, all-locked (front and rear) and all open.
- High-low transmission remotely shifts from the transmitter from a speed 25:1 high ratio to a to an unstoppable 70:1 super-low ratio.
- Authentic and functional ExoCage body structure resists damage.
- Waterproof electronics extend the the Extreme 4WD action into water, mud and snow.
- Summit's award-winning E-Revo suspension design delivers more suspension travel and articulation than any other monster truck.
- High-visibility 10-LED light system adds extra realism and opens the door to night-driving fun.
- Ultra-long-travel suspension based on the award-winning E-Revo.
- New Impact wheels with beadlock-style sidewall protectors.
- Oversized Canyon AT tires with soft foam inserts conform to rugged surfaces and bite hard for amazing grip.
- Independent suspension and the Canyon AT tires give Summit the highest ground clearance in it's class and incredibly steep approach angles.

Lock and unlock on-demand
from your transmitter

TRAXXAS TQ™ 2.4GHZ SPREAD SPECTRUM RADIO SYSTEM

For years, hobbyists have counted on the reliable, long-range operation and all-day comfort and balance of Traxxas' TQ and TQ-3 radio systems. Now the TQ series is joined by the TQ 2.4GHz, which brings the convenience of crystal-free, channel-free operation to your RC experience. The transmitter and receiver are digitally "linked" for glitch-free operation without the need to monitor channels or frequencies; the 2.4GHz circuitry automatically locates and locks onto an open frequency each time you switch it on. If there is ever a problem with reception, the built-in failsafe software automatically returns the throttle to neutral to stop your model safely.

- Automatically locates and locks onto an open frequency when you switch it on.
- Four-channel micro receiver with two steering servo inputs for dual-servo use.
- No need to carry crystals or select channels.
- Built-in failsafe.
- Comfortable TQ case design.
- Worry-free long range.

EXTREME 6S LIPO POWER. 50+MPH

Traxxas E-Revo® Brushless Edition

The speed fiends at Traxxas have done it again. For the first time, high-speed, high-voltage 6S brushless performance is available Ready-to-Race.® Not a conversion. Not a retrofit. This is brushless performance done the Traxxas way, engineered from the start for the demands of the most powerful motor systems. The E-Revo Brushless Edition comes complete with a factory-installed and programmed Castle Creations Mamba Monster™ motor and electronic speed control system. This heavy-duty setup is designed for 6S LiPo (25.2 volts max) compatibility, which gives E-Revo the ability to exceed 50-mph with wheel-lifting torque and brutally quick acceleration. No modifications are required to handle the extra power; all of the drivetrain and transmission components were designed from the start for exactly this type of high-amp, high-rpm horsepower. With a beast this powerful, it's important to hold onto the reins. That's why the E-Revo Brushless Edition is the first truck to get Traxxas' new 2.4GHz radio system for glitch-free, long-range performance.

- Rated for 6S LiPo operation.
- Low-voltage detection for LiPo use.
- Integrated cooling fan.
- 6.5mm gold-plated bullet connectors.
- Castle Link compatible for tuning via computer using USB cable (Castle Link sold separately).
- New 2.4GHz TQ transmitter and 4-channel receiver.
- Integrated dual battery compartments with quick release battery doors.
- Dual digital high-torque steering servos.
- Hard-anodized Teflon-coated shock bodies with TiN coated shock shafts.
- Sealed pivot ball suspension and limited slip differentials.

BRUSHLESS EDITION

COMING SOON

1/16 E-Revo & Slayer EX

When is a mini not a mini? When it's done the Traxxas way: with the quality, innovations, and features that make the rest look like toys. Although half the size of the E-Revo and Slayer trucks that they emulate, Traxxas' new 1/16 scale E-Revo and Slayer EX models don't skimp on features or performance. Oil-filled shocks, rocker-actuated suspension, integrated battery compartments with snap-shut doors—everything that makes our "big" trucks great is included. They're even water-sealed for non-stop action in snow, mud and water. Coming soon to your favorite hobby shop, stay tuned to Traxxas.com for more!

TRAXXAS ACCESSORIES:

Traxxas Officially Licensed Team Bodies for Slash™ and Slayer™

#5914
Slayer® Center Differential Kit

#5918X
Lightweight Aluminum
Push Rods for Slayer

#5938R
TUBES™ Lightweight Aluminum
Turnbuckles for Slayer

#5467A, 5467R, 5460R, 5460A
Red and Blue Anodized GTR
Shock Bodies

#5353X
Aluminum 17mm Splined Wheel
Hub And Hex Nut

#5973A - Slayer
#5875A, 5873A - Slash Front, Rear
Red Beadlock Style Wheels

#5498
Performance Sway Bar Kit
for Slayer™

#5395X
Reverse Installation Kit for
T-Maxx® 3.3 and Revo® 3.3

#3350
Velineon® Brushless Power System

#3743X, 3743A
Red or Blue-Anodized Steering
Bellcranks for Slash, Rustler, Bandit,
and Stampede

#5020 - Top Fuel® Power Plus™ 20% Qt.
#5070 - Top Fuel Power Plus 20% Gal.

#5001 - Fuel Filler Bottle
#5001R - Fuel Filler Bottle
Rebuild Kit
